DETAILED ACTION

1. This action is in response to Applicant's amendment received on 19 November 2003.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the design indicia on the clip of claims 15 and 27 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 15 and 27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is not mentioned in the specification that the clip maintains a design indicia, and it is not known if the clip itself is supposed to have a design indicia on it or not. Page 7, lines 3-7

of the specification state that the punch tool maintains a design indicia, but there is no reference to the clip maintaining a design indicia. Furthermore, the drawings only show a design indicia on the punch tool, and there is no figure with a design indicia on the clip itself.

Allowable Subject Matter

5. Claims 1-11 and 16-26 are allowed.
